

PLAYLISTS

- Each BYP comes with a default Playlist – we encourage each user to set up a custom playlist to match their inventory
 - To Set Up a Custom Playlist
 - Scan Delete Playlist barcode
 - Wait until the BYP Video Player returns to the screen.
 - Then scan Manage Playlist barcode
 - Then start scanning the barcode on products you would like to be on the playlist.
 - Once you have scanned all the barcodes you want to feature on the playlist – select Save Playlist.
 - BYP Video Player should start with the new playlist of products you selected
 - If this does not happen – try updating your device to the latest version.
